

C3 AI Named Leader in AI Platforms

August 10, 2026

Customers “rave about the business value...” — and the evaluation scored C3 AI highest in the current offering category

REDWOOD CITY, Calif.--(BUSINESS WIRE)--Aug. 10, 2026-- C3 AI (NYSE: AI), the Enterprise AI application software company, announced it was [recognized as a Leader by Forrester Research in its recent report](#), The Forrester Wave™: AI Platforms, Q3 2026 — with the highest score in the current offering category of all 15 providers evaluated.

Forrester evaluated the [C3 Agentic AI Platform](#), the end-to-end platform for developing, deploying, and operating Enterprise AI applications and agents. It models the entire enterprise as a single unified ontology graph, so every application and every agent draws on one source of truth. That foundation underpins C3 AI's turnkey application portfolio, including [C3 AI Reliability](#), [C3 AI Demand Planning](#), [C3 AI Process Optimization](#), and [C3 AI Inventory Optimization](#). It also powers [C3 AI Agentic Process Automation](#), which puts autonomous agents to work on business and operational processes, and [C3 Code](#), which generates production-grade applications from natural language.

“The engineers at C3 AI invented the concept of Enterprise AI; they invented model-driven architecture; they invented agentic AI; it is gratifying to see them recognized for their great accomplishment — the C3 Agentic AI Platform,” said Thomas M. Siebel, CEO, C3 AI.

C3 AI received the highest scores possible in eight criteria:

- **Data modeling:** One governed model of the entire enterprise — the ontology every application and agent works from.
- **Agent development:** Build and orchestrate multi-agent systems that execute business and operational processes.
- **AppGen tools:** C3 Code generates production-grade applications from natural language, interfaces and workflows included.
- **Cohesive experience:** One environment from data modeling through agent deployment.
- **Governance controls:** Unified policy, risk, and compliance controls that govern every agent in production.
- **Platform management:** Cost controls that tie agent and model spend to business outcomes.
- **Security certifications:** SOC 2, ISO, and FedRAMP, with deployments at the highest security levels.
- **Supporting services and offerings:** Turnkey applications, dozens of solution accelerators, and “white glove” implementation.

C3 AI also received above-average customer feedback in the evaluation. “Customers rave about the business value of the use cases they’ve implemented and C3 AI’s ‘white glove’ implementation and ongoing service,” the report states.
